The screenshot shows the Visual Studio Code interface with a workspace named 'calculadorapp'. The Explorer sidebar on the left shows the project structure, including files like 'calculadora.py', 'divide.py', 'log.py', 'multiplica.py', 'potencia.py', 'soma.py', and 'subtra.py'. The main editor window displays the code for 'calculadora.py', which is a Python script for a calculator. The code includes imports for other modules, input prompts for two numbers and an operation, and conditional logic to perform addition, subtraction, multiplication, division, exponentiation, or logarithm. The terminal at the bottom shows the execution of 'git status' and 'git add' commands, indicating that the files 'log.py' and 'potencia.py' are being tracked.

primeiro commit #4

Opencczld wants to merge 1 commit into RicardoMartinnns:main from cczld:caculadoraV2

Conversation0Commits1Checks0Files changed2

cczld commented 3 hours ago • edited

Adiciona mais funções à calculadora: exponenciação e logaritmo.

primeiro commit

cczld marked this pull request as draft 3 hours ago

cczld marked this pull request as ready for review 3 hours ago

No conflicts with base branch

Changes can be cleanly merged.
